

prof. MUDr. Roman Hájek, CSc.

Vice-Rector for Strategy and Development

Faculty of Medicine, University of Ostrava, Czech Republic

To Whom It May Concern

I am pleased to be able to support dr. Artur Jurczyszyn for academic advancement to Professor of Medicine.

Dr. Jurczyszyn and I met many years ago in Poland during scientific meetings of Polish Myeloma Study Group. Artur also is an active member of International Myeloma Working Group and was participating in a series of collaborative studies in the field of multiple myeloma. He is well-known in the community of plasma cell dyscrasia and he is considered a leading authority of multiple myeloma in Poland.

Dr. Jurczyszyn is an active member of the international joint project titled: Hematooncology in Focus – Visegrad Cooperation.

Together with Visegrad Cooperation we have written several manuscripts and organized annually scientific meetings in Ostrava during last 5 years and Artur was always active member.

I consider dr. Jurczyszyn to be a scientist of extraordinary knowledge, experience and unique professional talents. He is, without a doubt, a scholar whose work has been recognized internationally for its enormous impact on the field.

Sincerely,

ROMAN HAJEK
