Salamanca, 8th February, 2021

To whom it may concern

On behalf of the Haematology Department of the Hospital Universitario de Salamanca, Spain, and in my capacity as responsible of the Multiple Myeloma Unit, I would like express support for Prof. Artur Jureczyszyn's endeavour to organise the International Symposium of Amyloidosis (ISA) to be celebrated in Kraków in 2024.

I am really convinced that the historical old capital of Poland will impart an appealing cultural experience to ISA and will further its organiser's efforts make it a great success.

I will be happy to support and promote the ISA among the Haematology community here in Spain.

I wish you a great deal of success.

Yours faithfully

Dr. M. Victoria Mateos
