

Leuven, 8 February 2021

O. Ref. LKI2021-02-08 MDms

On behalf of the Leuven Cancer Institute and myself as its Chairman, I hereby confirm we strongly support prof. Artur Jurczyn's organization of the International Symposium of Amyloidosis (ISA) in Krakow in September 2024.

The Leuven Cancer Institute (LKI) was established as part of the KU Leuven and University Hospitals Leuven.

In LKI, cancer researchers, cancer specialists and care providers unite their expertise and experience in the fight against cancer. LKI combines and integrates research, therapy and care to boost interaction between these domains.

In this respect, we support the organization of the Symposium and we will be happy to contribute by promoting the Symposium across our extensive network.

Yours sincerely,

Prof. Dr. Michel Delforge
Chairman of the Leuven Cancer Institute

Chairman of the Belgian Hematology Society Myeloma Subgroup

Clinical Head at the Department of Hematology University Hospitals Leuven
